

I expect full privacy on my home telephone I pay a monthly charge for a private telephone to use only at my choice I will not accept any phone calls from solicitors or former companies that we may have had dealings with. If this state law is tampered with or superceeded by government agencies it would create a major hardship on my wife and myself as we would be forced to terminate our telephone service. We are both in poor health and need to be able to contact our children when we need assistance.I plan to contact our U.S. Senators and Congressman about your interfering with individual privacy
